Data Visualization Capstone

REVIEW

HISTORY

Meets Specifications

Hello Muhammed,

Congratulations!

You've passed the project.

I really appreciate the time and effort spent here on that awesome project!

I liked the level of detail used while typing the blog. And the amazing organized structure you have used from the intro about the dataset and until explaining how you have improved the original visualization.

I've added suggestions and resources for further Improvements in [the previous review](#) and another suggestion in this review.

From the skills shown here, I strongly recommend that you keep practicing your skills using the datasets provided on [Kaggle](#) and [MakeoverMonday](#).

I wish you all the best in what's coming next.

Stay Safe,

Your Reviewer,

Please don't forget to rate this review, your feedback matters.

Goal of the Data Visualization

Student must include a question, problem statement or story headline or caption.

Excellent!

- You've started the blog with a catchy title.

Suggestion

- Good titles also require good endings. So please don't forget to always close the blog with a Call-to-action as explained [Here](#).

Choice of Data Visualization

Student should make an argument for which their analysis or dashboard design or type of data visualization or data story type improves how the problem statement or question is addressed in improved ways.

Great Job!

- You've explained how you had improved the existing visualization by creating a Dashboard with better charts, layout, and annotations to show more Information.

Annotations and Display

The annotation, supportive text, and story headlines improve the reader's experience compared to the current visualization.

Acknowledgements

Students should include citation and reference to the MakeoverMonday dataset and data visualization.

Great Job!

- The Blog includes every resource that has been used: The Dataset, The Original Visualization, The Website (MakeoverMonday), and The Dashboard Link.
